L3 ANSWER 6 OF 8 CAPLUS COPYRIGHT 2007 ACS on STN

TI Use of Aerosil A-300 and GF/F (GF/C) filters for the purification of DNA fragments, plasmid DNA, and RNA

AB Aerosil A-300 and GF/F (GF/C) filters were used for the purification of plasmid DNA and intact RNA as well as for the recovery of DNA fractionated on agarose gels. In the presence of guanidinium thiocyanate Aerosil A-300 and GF/F (GF/C) filters selectively bound nucleic acids, while proteins, agarose polysaccharides, and salts were washed off. Nucleic acids desorbed from the Aerosil and the filters were immediately available as substrates for different biochem. procedures.
